## OBJECTIVE

---

Computer Science undergraduate passionate about full-stack development and data analytics. Experienced in building scalable web applications using modern tech stacks like MERN and Next.js. Strong foundation in problem-solving, and collaboration. Eager to contribute to innovative software projects and continuously improve technical skills.

## EDUCATION

---

**BNM Institute of Technology**, Bengaluru

2021 – 2025

Bachelor of Engineering in Computer Science and Engineering

CGPA: 9.54 / 10

## SKILLS

---

**Programming Languages:** C, Python, Java

**Frameworks:** Django, NodeJS, ExpressJS, ReactJS, NextJS

**Databases:** MySQL, MongoDB

**Statistics:** Linear Algebra, Hypothesis Testing, ANOVA, Time Series Analysis

**Soft Skills:** Teamwork, Problem-solving, Decision-making, Time Management

## EXPERIENCE

---

**Software Developer Intern**

Oct 2024 - Mar 2025

Amiti Software Technologies

Bengaluru, India

- **Role :** Developed multiple front-end and full-stack applications, including a news site, weather app, eCommerce platform, real-time chat app (MERN + Socket.io), and a scalable social media platform (Next.js). Gained hands-on experience in API design, development, and testing using Postman and Thunder Client.
- **Tools and Technologies worked on :** MongoDB, ExpressJS, ReactJS, NodeJS, NextJS, Postman, Git

## PROJECTS

---

**Edu Pro :**

- Edu Pro is a comprehensive student management system designed to streamline enrollment, attendance tracking, grading, and communication processes for educational institutions.
- Built with a frontend using HTML, CSS, JavaScript, and Bootstrap, and a backend powered by Django and MySQL, ensuring reliability, scalability, and ease of use for administrators and staff.

**Connectify :**

- Connectify is a real-time chat application built using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Socket.io, enabling users with instant message delivery. Designed with a modern and responsive UI, it provides a seamless and interactive messaging experience.
- Frontend designed using ReactJS and TailwindCSS. Backend established through NodeJS and ExpressJS, MongoDB and Socket.io

**Socially :**

- Full-stack social media platform using Next.js, PostgreSQL, Prisma, and Clerk. Features secure auth, dynamic routing, and high performance with modern UI (Tailwind, Shadcn).
- Frontend and backend built with Next.js, TypeScript, and Tailwind CSS, ensuring a seamless and modern user experience. Backend powered by PostgreSQL, Prisma, and Clerk, enabling efficient database management, authentication, and secure data handling

### **Code Craft :**

- Code Craft is a powerful online IDE designed to provide a seamless and interactive coding experience. Supports multiple programming languages and offers a fully customizable interface for developers. Whether you're coding solo or collaborating with a team, Code Craft ensures a smooth workflow with its advanced features.
- Frontend and backend built with Next.js, TypeScript, and Tailwind CSS, ensuring a seamless and modern user experience. Backend powered by Convex and Clerk, enabling efficient database management, authentication, and secure data handling

### **NeuroFit :**

- NeuroFit is an AI-powered fitness platform that delivers personalized workout and diet plans through an intuitive voice interface. It provides real-time program generation tailored to user goals, promoting a smarter, more efficient fitness journey.
- Built using Next.js, TypeScript, Tailwind CSS for the frontend, and Convex, Clerk, Vapi AI, and Gemini AI on the backend to ensure seamless authentication, intelligent voice interaction, and dynamic content delivery.

### **ConvoX :**

- ConvoX is a real-time language exchange platform designed to connect users globally through messaging, voice, and video interactions. Features include typing indicators, message reactions, screen sharing, and session recording to enhance engagement and interactivity.
- Built with React, Express, MongoDB, and Tailwind CSS, with global state managed via Zustand and data fetching optimized using TanStack Query. Implements JWT-based authentication and protected routes to ensure secure access, and leverages Stream for scalable, production-grade messaging and video calling.

## **CERTIFICATIONS**

---

- NPTEL Certified - Ethical hacking (October 2024)
- IBM Certified - Data Visualization with Python (May 2024)
- NPTEL Certified - Cloud Computing (April 2024)
- IBM Certified - Python for Data Science, AI and development (March 2024)
- Python and Django Full Stack Web Developer Bootcamp (May 2023)

## **ACHIEVEMENTS**

---

### **Final Year Project: uFood – Your Meal, Your Way, Say Goodbye to Food Waste**

- Developed an innovative smart meal customization platform aimed at reducing food waste through user-centric personalization.
- Recognized and awarded as “Best Project” for excellence in innovation, design, and sustainability impact.
- Presented at the 2025 International Conference on Intelligent and Innovative Technologies in Computing, Electrical and Electronics (IITCEE) and published on IEEE Xplore for its practical contribution to environmental sustainability.

## **EXTRA CURRICULAR ACTIVITIES**

---

- Participated in the cycle street rally conducted by Vikasana Foundation for three consecutive years (2022,2023,2024)
- Participated in a teaching and cleaning program organized by NSS at Government School, Shanuboganahalli, Bannerghatta Road
- Contributed as an active volunteer in conducting Repurpose Drive organized by an NGO named FLAG(Fight Like A Girl)
